

IPO | Ordinary | Policy probabilities over iterations
alpha=0.9, lambda=0.8, beta=0.2, seed=0 | No history correction
Sequence-sum probabilities normalized over the same four candidate responses

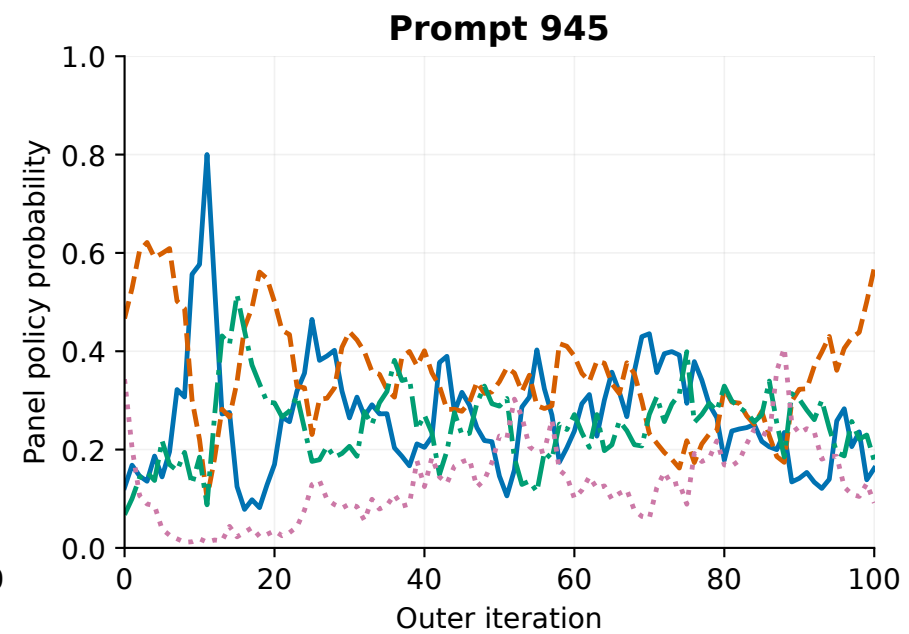

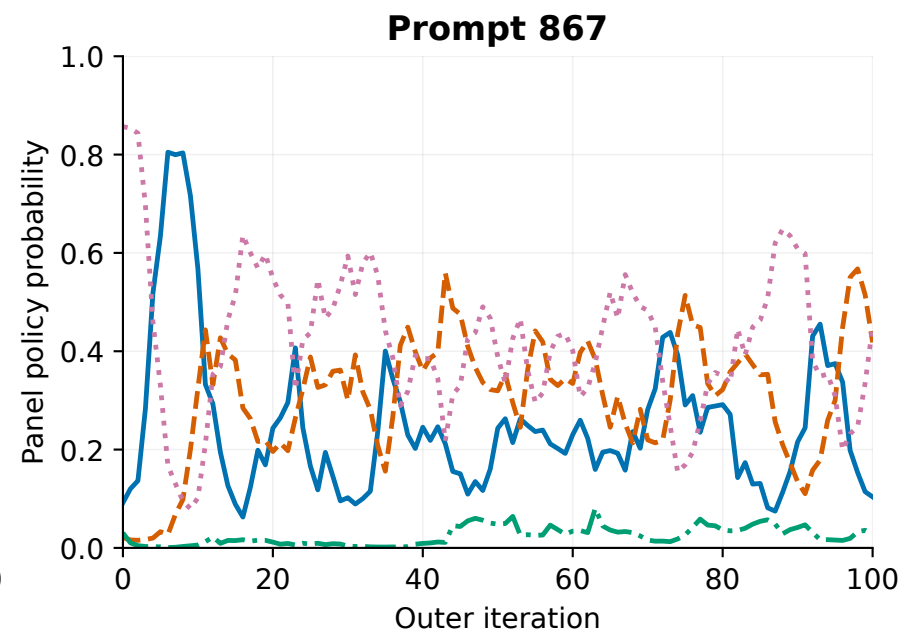

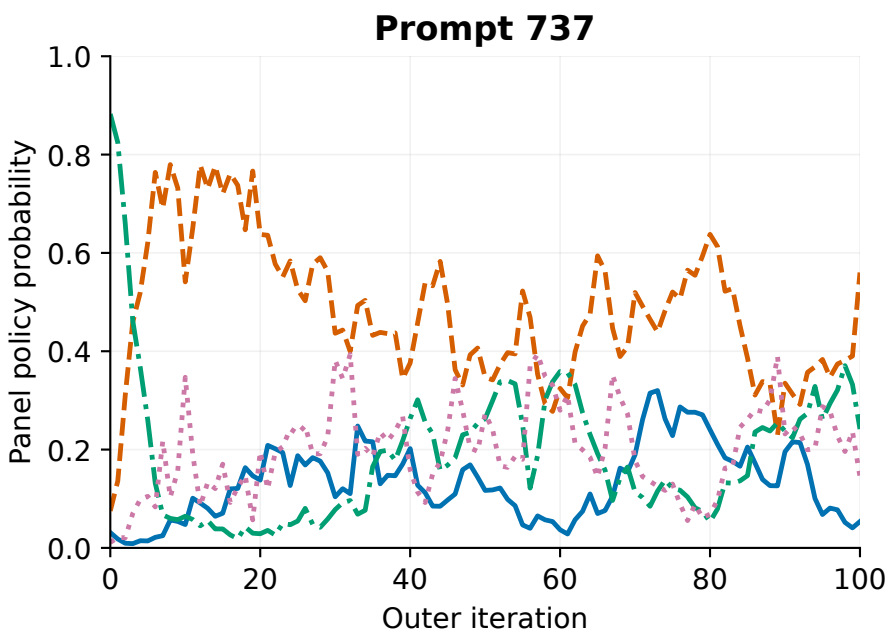

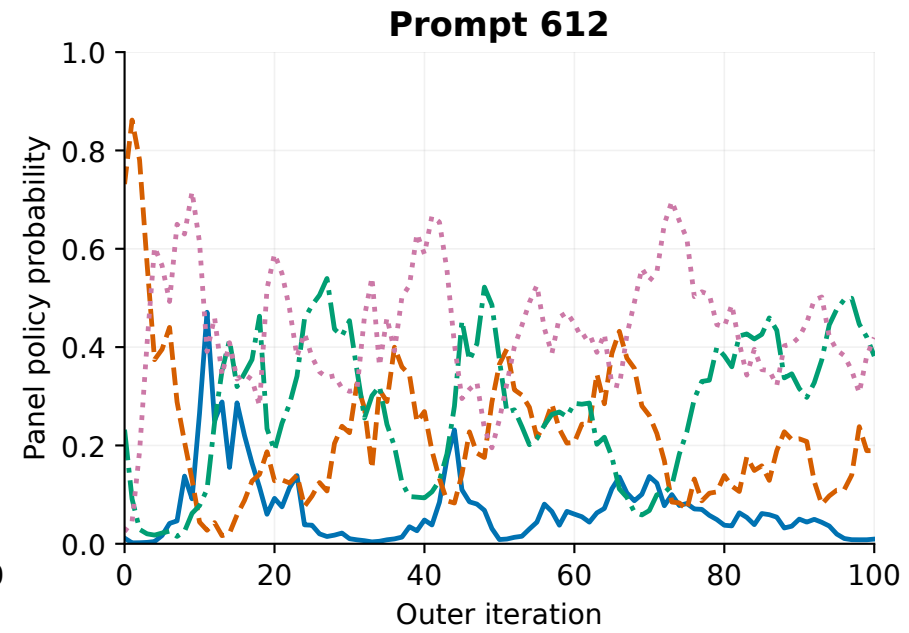

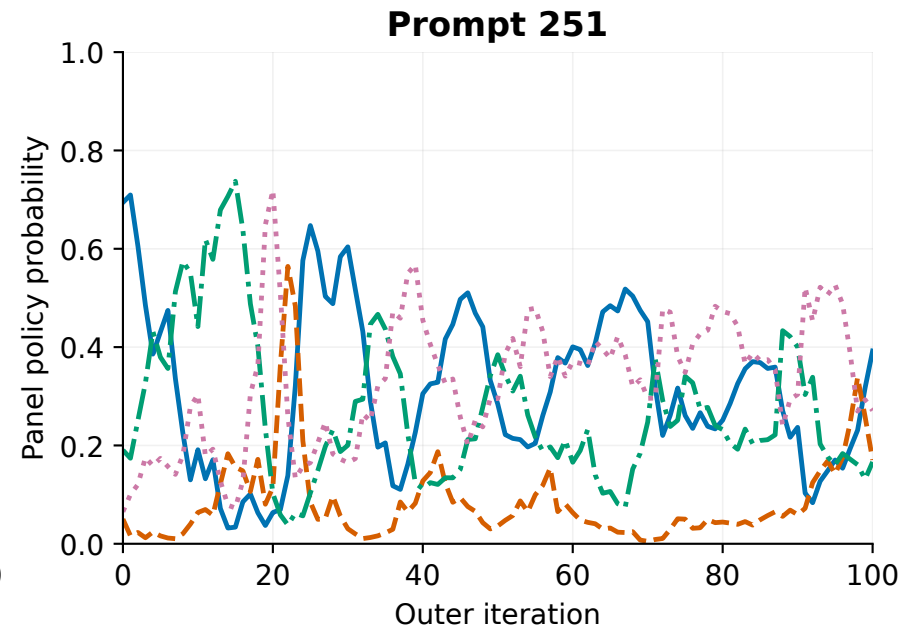

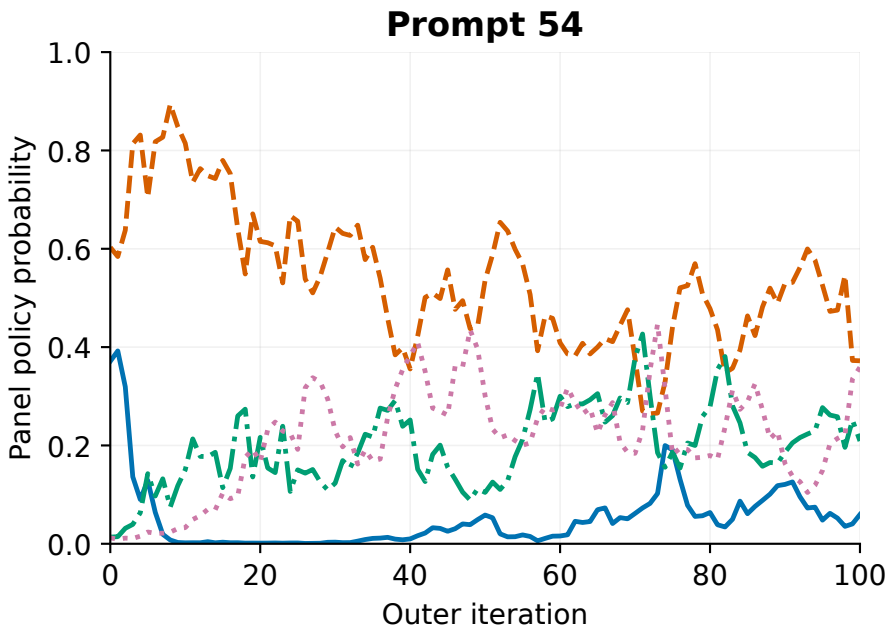

— Response 1 - - - Response 2 - . - Response 3 . . . Response 4

IPO | Reference | Policy probabilities over iterations
alpha=0.9, lambda=0.8, beta=0.2, seed=0 | Lagged reference: nu=0.45
Sequence-sum probabilities normalized over the same four candidate responses

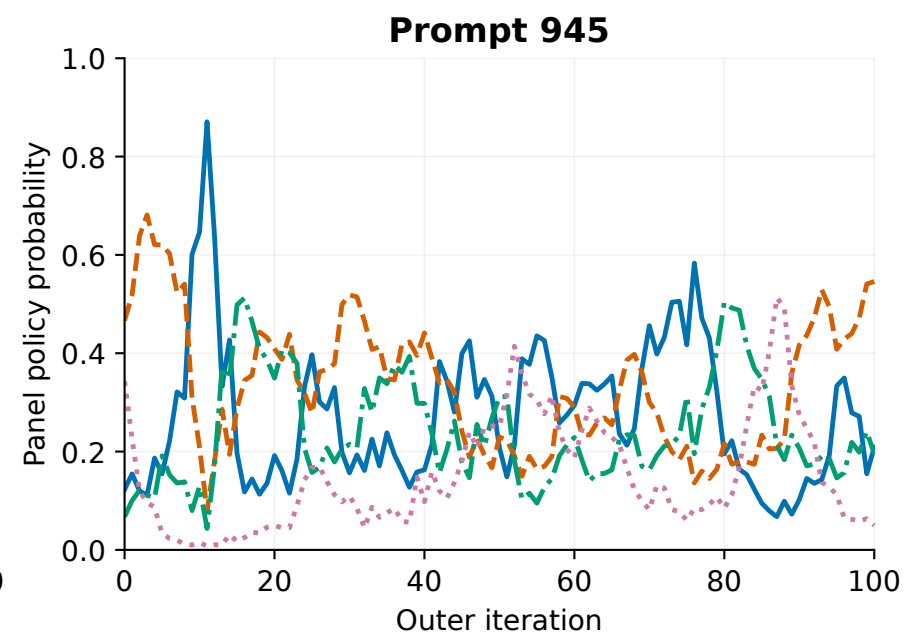

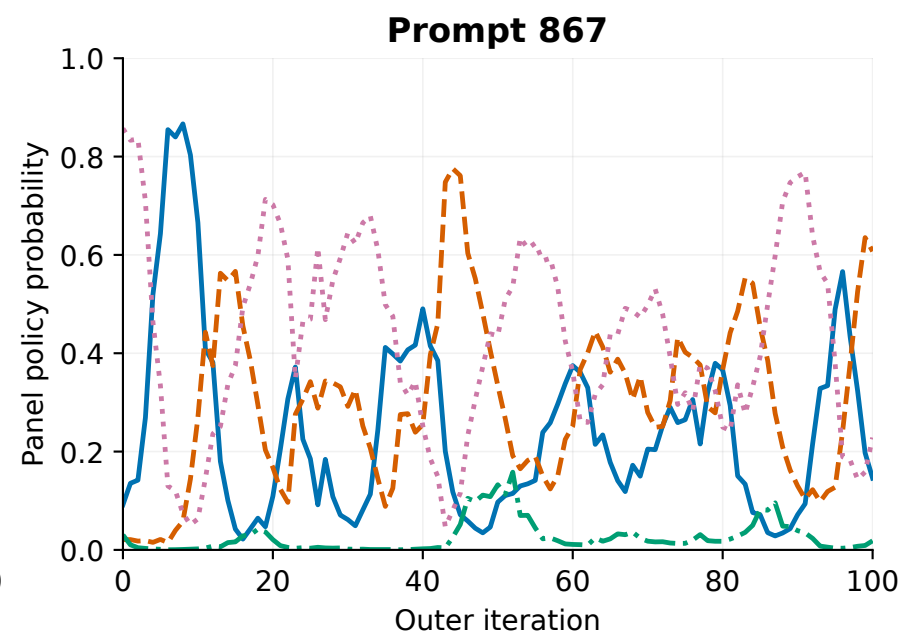

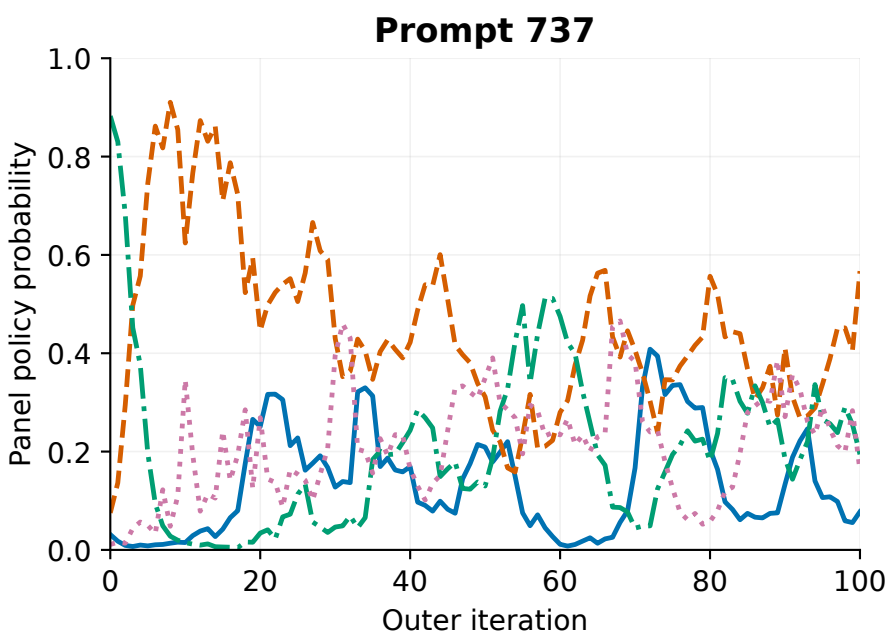

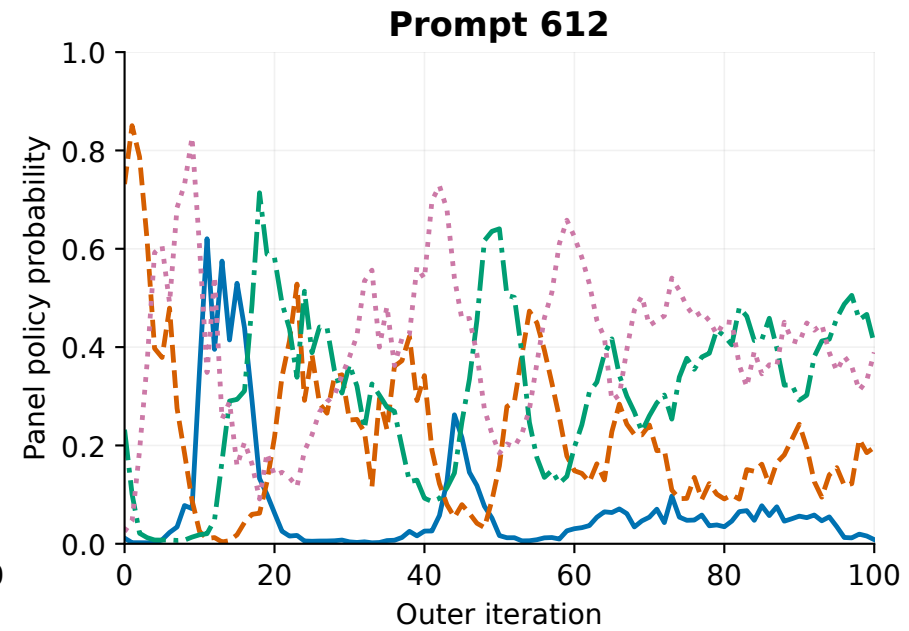

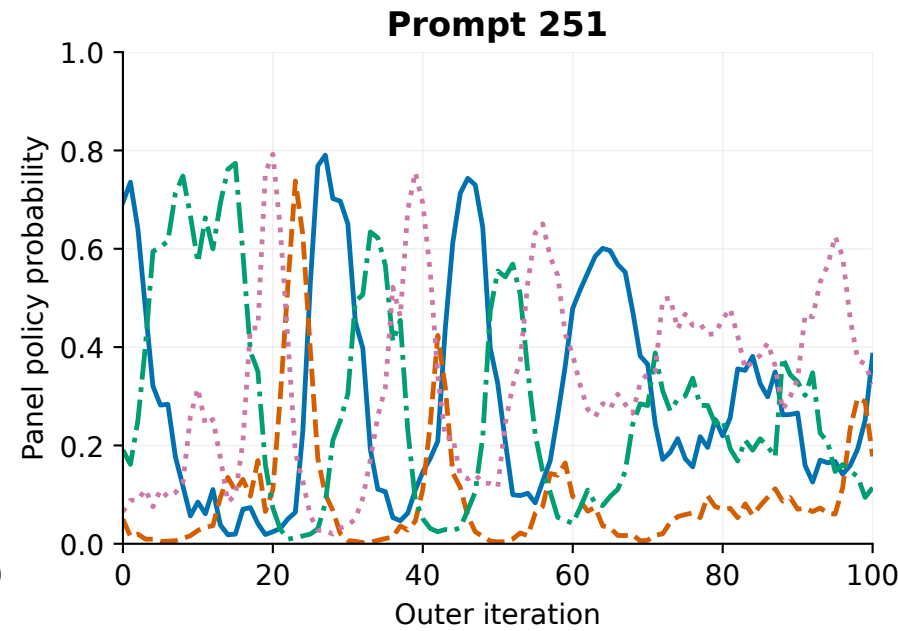

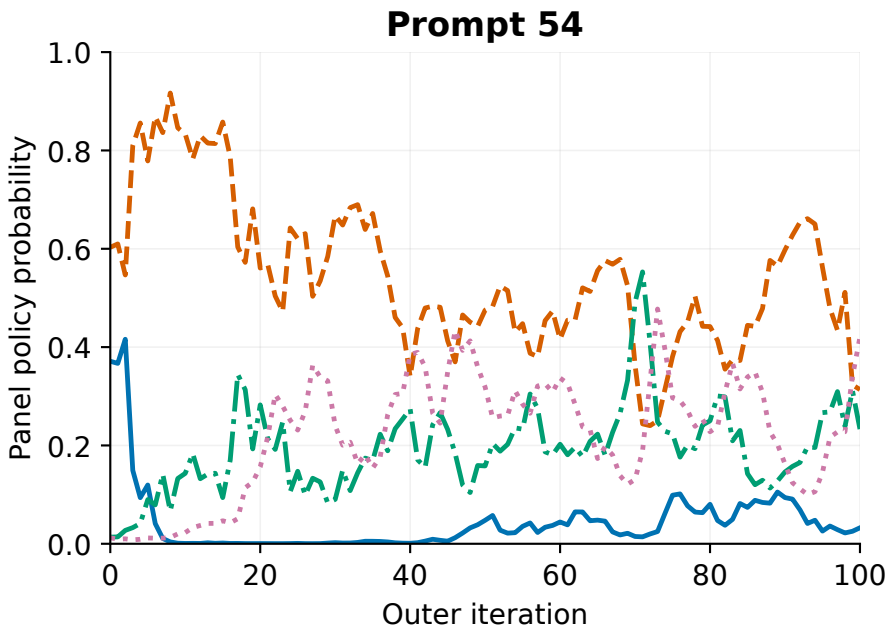

— Response 1 - - - Response 2 - . - Response 3 . . . Response 4

IPO | Feedback | Policy probabilities over iterations
alpha=0.9, lambda=0.8, beta=0.2, seed=0 | Feedback extrapolation: kappa=0.5
Sequence-sum probabilities normalized over the same four candidate responses

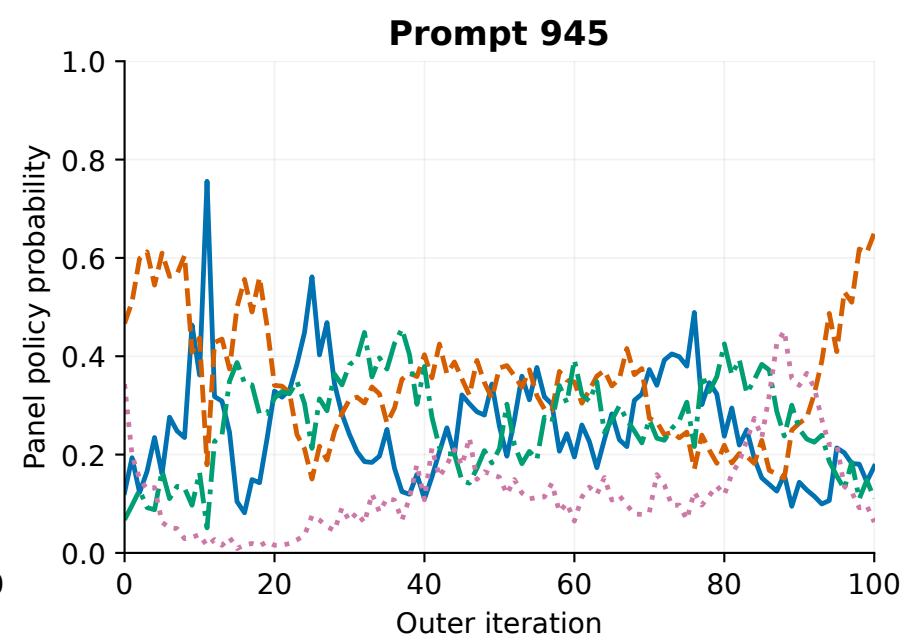

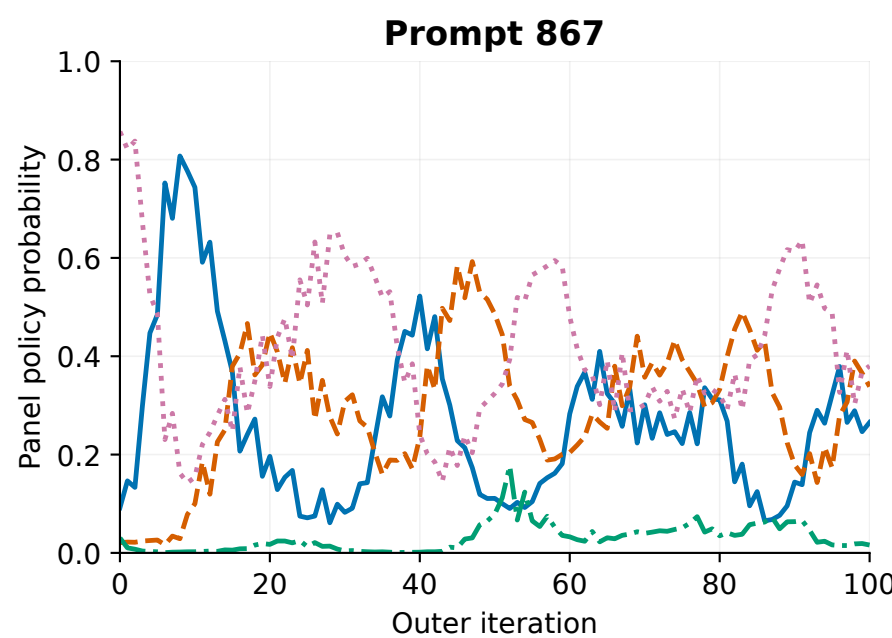

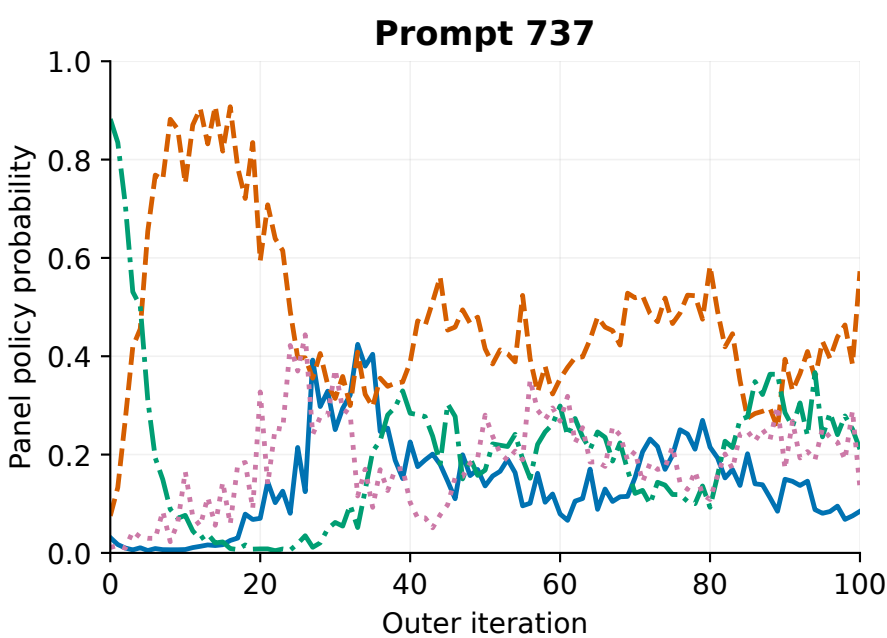

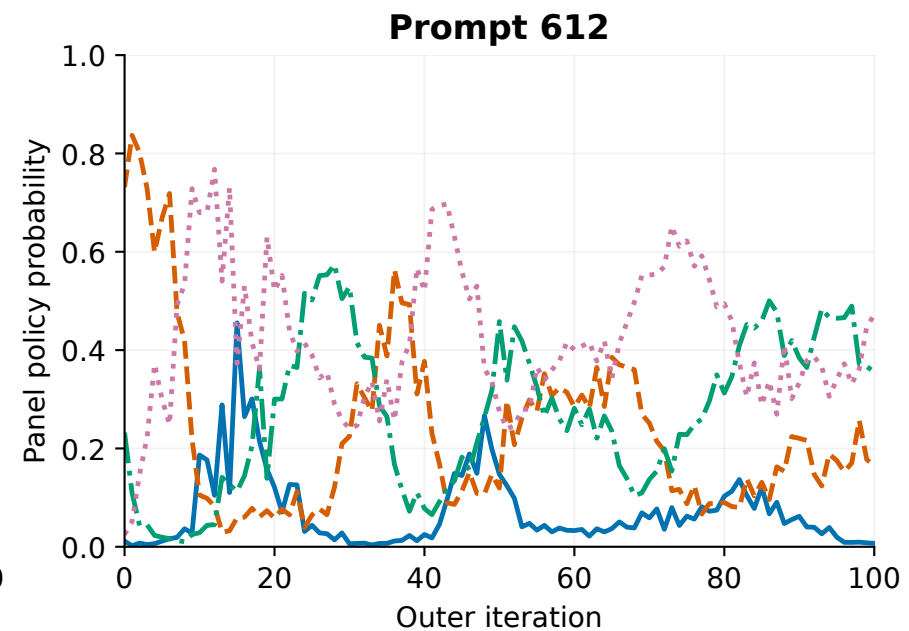

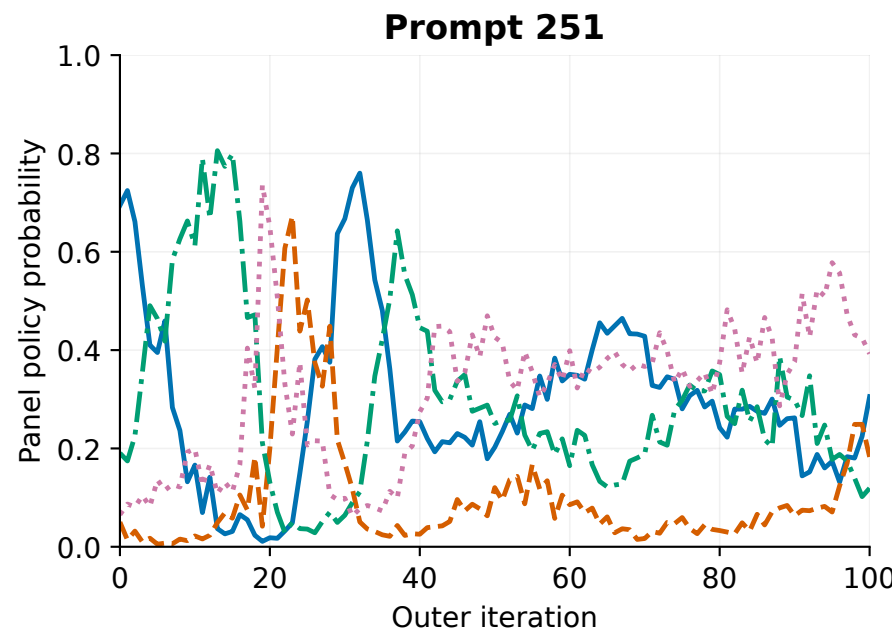

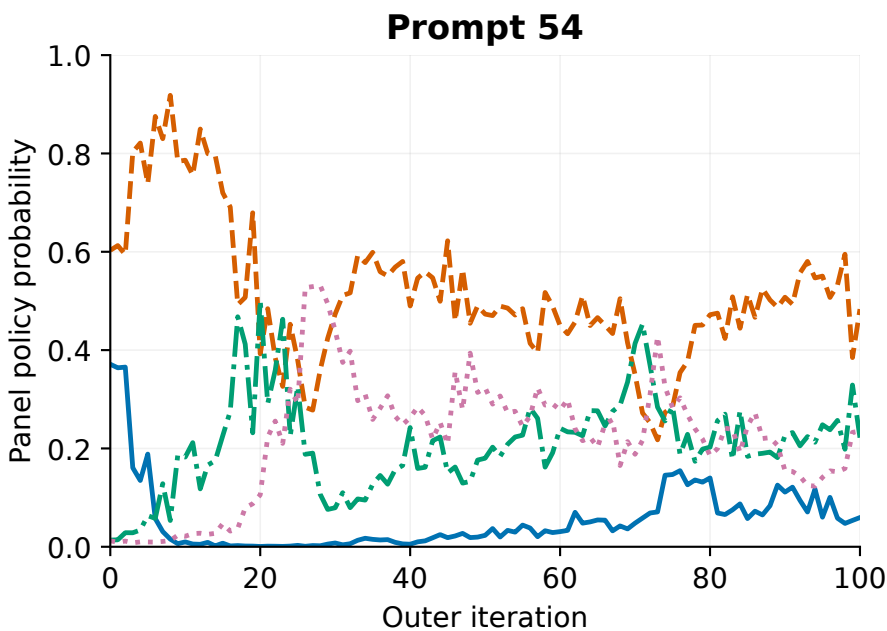

— Response 1 - - - Response 2 - . - Response 3 . . . Response 4

DPO | Ordinary | Policy probabilities over iterations
alpha=0.9, lambda=0.8, beta=0.8, seed=0 | No history correction
Sequence-sum probabilities normalized over the same four candidate responses

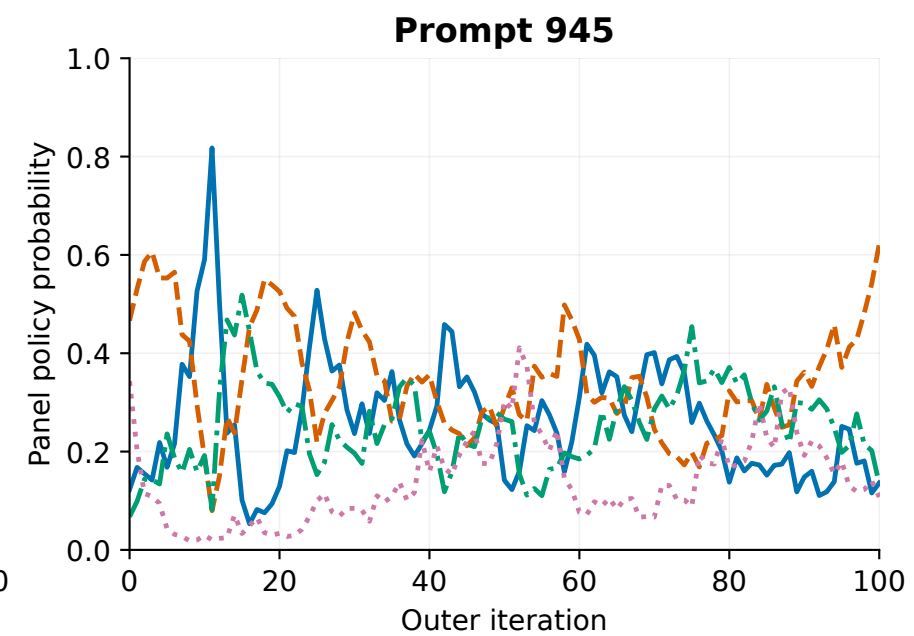

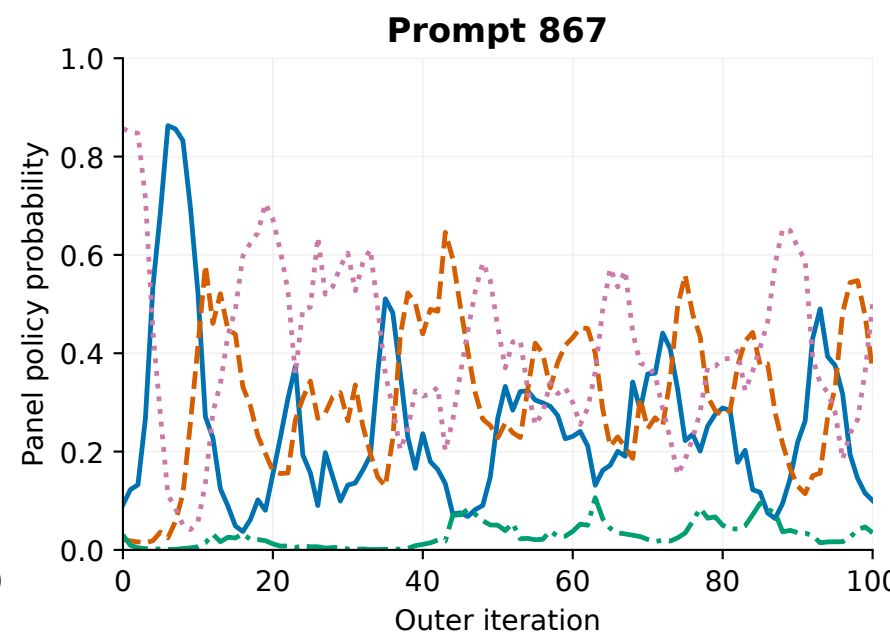

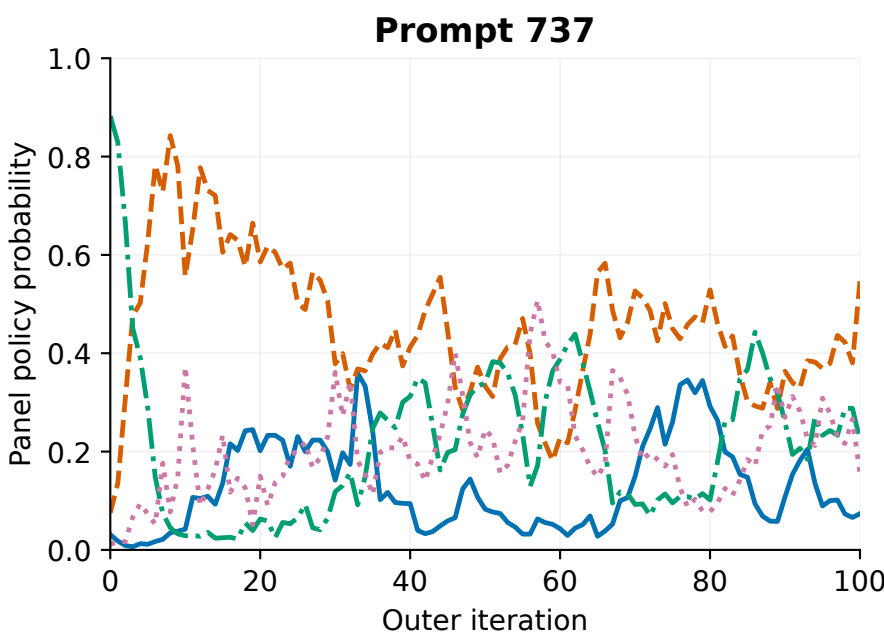

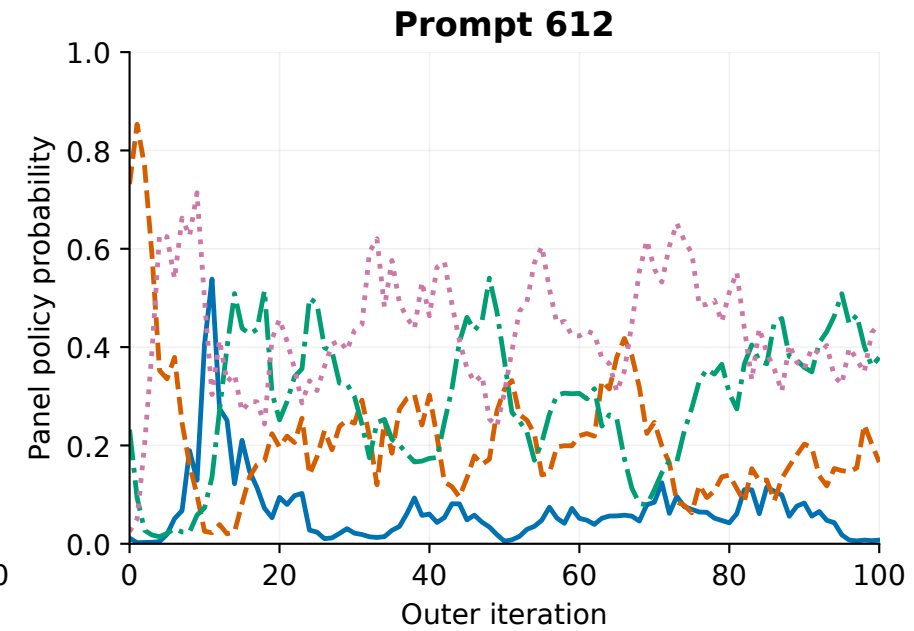

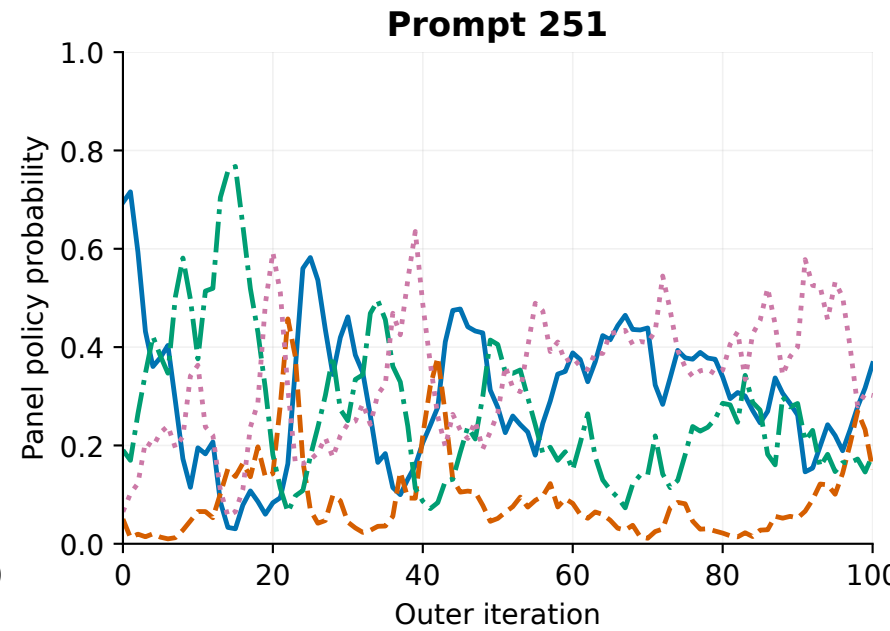

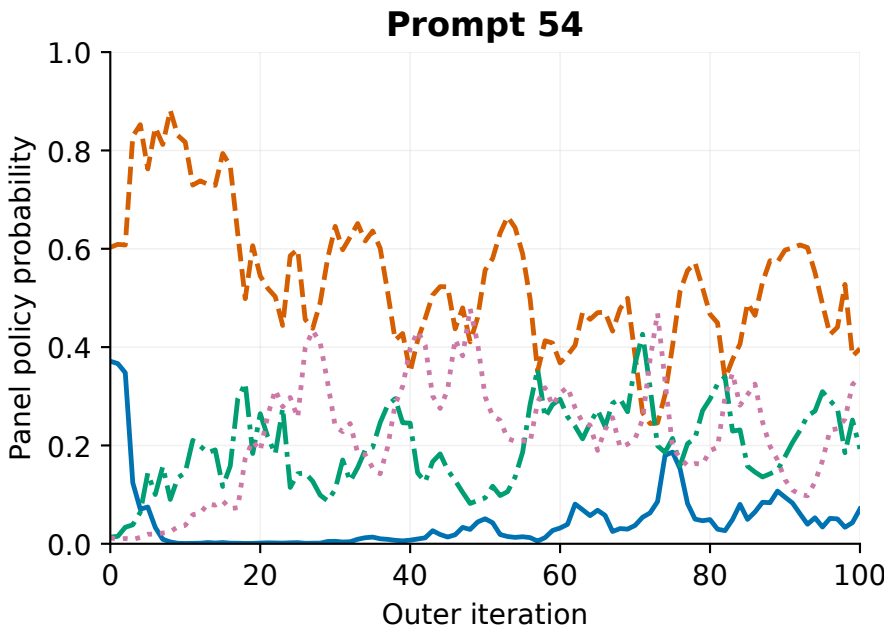

— Response 1 - - - Response 2 - . - Response 3 . . . Response 4

DPO | Reference | Policy probabilities over iterations
alpha=0.9, lambda=0.8, beta=0.8, seed=0 | Lagged reference: nu=0.45
Sequence-sum probabilities normalized over the same four candidate responses
